Amendments to the Claims:

This listing of claims replaces all prior versions, and listings, of claims in this application.

Claim 1 (Withdrawn): An information recording method comprising:

recording object information in an information recording medium; and

recording reproducing control information, which defines a method of reproducing the object information and defines a predetermined command executed according to a predetermined operation of a user or other reproducing control information, in the information recording medium.

Claim 2 (Withdrawn): An information recording method according to claim 1, wherein the predetermined command is a command which is executed when a timer is made valid and a predetermined time is elapsed.

Claim 3 (Withdrawn): An information recording method according to claim 2, wherein the reproducing control information defines other reproducing control information which is linked when the timer is made valid and the predetermined time is elapsed.

Claim 4 (Withdrawn): An information recording method according to claim 2, wherein the reproducing control information further defines control information whether the timer is reset or not according to the user operation during action of the timer.

Claim 5 (Withdrawn): An information recording method according to claim 1, wherein the reproducing control information is PGC in resuming operation.

Claim 6 (Withdrawn): An information recording method according to claim 1, wherein the information recording medium is an optical disk.

Claim 7 (Withdrawn): An information recording method according to claim 1, wherein the predetermined command determines whether a title reproduced last is an original story or VAM and commands a resuming action in the case of the original story or commands not to return to VAM but to start reproduction of the original story.

2

Claim 8 (Cancelled).

Claim 9 (Currently Amended): An information storage medium according to claim 21, wherein the resume command is a command configured to be ~~which is~~ executed when a timer is made valid and a predetermined time is elapsed.

Claim 10 (Previously Presented): An information storage medium according to claim 21, wherein a reproducing control information stored in the video and the data recording area defines other reproducing control information which is linked when a timer is made valid and the predetermined time is elapsed.

Claims 11-12 (Cancelled).

Claim 13 (Previously Presented): An information storage medium according to claim 21, wherein the information recording medium is an optical disk.

Claim 14 (Currently Amended): An information recording medium according to claim 21, wherein a ~~the~~ predetermined command is configured to determine ~~decides~~ whether a title reproduced last is an original story or a value-added image and wherein the predetermined command is configured to command ~~commands~~ a resuming action in the case of the original story or command ~~commands~~ not to return to the value-added image but to start reproduction of the original story.

Claim 15 (Withdrawn): An information reproducing apparatus comprising:

a reading portion which reads out object information and reproducing control information, which are recorded in an information recording medium; and

a reproducing portion which reproduces the object information read by the reading portion according to the reproducing control information and executes a predetermined command or other reproducing control information according to definition of the reproducing control information when a predetermined operation of a user is detected.

Claim 16 (Withdrawn): An information reproducing apparatus according to claim 15,

wherein the predetermined command is a command which is executed when a timer is made valid and a predetermined time is elapsed.

Claim 17 (Withdrawn): An information reproducing apparatus according to claim 15, wherein the reproducing portion resets a count of the timer according to the definition of the reproducing control information when the predetermined operation is carried out.

Claim 18 (Withdrawn): An information reproducing apparatus according to claim 15, wherein the reproducing portion resets a count of the timer according to the definition of the reproducing control information when the predetermined operation is carried out, and the reproducing portion resumes the count of the timer again after the predetermined operation is completed.

Claim 19 (Withdrawn): An information reproducing apparatus according to claim 15, wherein the reproducing control information is PGC in a resuming operation.

Claim 20 (Withdrawn): An information reproducing apparatus according to claim 15, wherein the information recording medium is an optical disk.

Claim 21. (Currently Amended): An information storage medium encoded with a data structure comprising:

a video and a data recording area included within a data area,

wherein the video and the data recording area includes a program chain command table information having a description area, the description area storing a pre-command, a post-command, a cell command, and a resume command,

wherein the resume command is processed in a disk player which reproduces the information medium such that when a resume operation is executed, the disk player is configured to check an existence of the resume command in the program chain command table information which is specified by a resume information, before starting playback of the program chain command table information, and when the resume command exists in the program chain command table information, the resume command is executed at first in the disk player and when the resume command does not exist in the program chain command table information, the resume operation is executed in the disk player.
